

Sonali e-Wallet API Integration Document

This document provides detailed instructions for integrating with the Sonali e-Wallet API using Basic Authentication. All API endpoints require authentication with the provided credentials. The document covers the API endpoints, request/response formats, and sample code for integration.

Authentication

- **Method:** Basic Authentication
- **Username:** sonali
- **Password:** Sblwallet@\$2021
- **Base64 Encoded Credentials:** c29uYWxpOlNibHdhbGxldEAkMjAyMQ==
- **Header:** Include Authorization: Basic c29uYWxpOlNibHdhbGxldEAkMjAyMQ== in all API requests.

Base URL

<http://10.32.84.5:6767/SBLWalletBanking/eWallet>

API Endpoints

1. Get Wallet Enquiry

Retrieve wallet details for a specific user based on their mobile number and user ID.

- **Endpoint:** /getWalletDetails
- **Method:** POST
- **Content-Type:** application/json
- **Request Body:**

```
{  
  "mobileNo": "01710563521",  
  "userId": "Agx01254"  
}
```

- **Response:**

```
{  
  "status": "200",  
  "statsDetails": "Success",  
  "name": "Md. Hasan Monsur",  
  "walletStatus": "",  
  "PID": "19843323001190673",  
  "dateOfBirth": "1984-01-03",  
  "fatherName": "Md. Abdus Salam",  
  "motherName": "Most Hasina Begom",  
  "email": "hasan.monsur@sonalibank.com.bd",  
  "balanceAmount": "5000",  
  "acList": [  
    {  
      "accountNo": "0002634313655",  
      "accountName": "Md. Hasan Monsur",  
      "branchName": "Local Office",  
      "branchCode": "00026"  
    }  
  ]  
}
```

- **Status Codes:**
 - 200: Success
 - 203: Fail
 - 401: Unauthorized
 - 206: Data error
- **Wallet Status Codes:** (To be provided by the API provider)

2. Fund Transfer (Payment)

Initiate a fund transfer from a wallet.

- **Endpoint:** /FundTransfer
- **Method:** POST
- **Content-Type:** application/json
- **Request Body:**

```
{
  "WalletNo": "1234567890",
  "Amount": 1000.50,
  "InvoiceNumber": "INV-2023-001",
  "ServiceId": "ETC"
}
```

- **Response:**

```
{
  "WalletNo": "1234567890",
  "Amount": 1000.50,
  "InvoiceNumber": "INV-2023-001",
  "StatusCode": "200",
  "TranId": "TXN123456789",
  "TranDate": "2023-11-15T14:30:45",
  "StatusMessage": "Transaction completed successfully"
}
```

- **Status Codes:**
 - 200: Success
 - 203: Fail
 - 401: Unauthorized
 - 206: Data error
- **Wallet Status Codes:** (To be provided by the API provider)

3. Fund Transfer (Payment Reverse)

Reverse a previously executed fund transfer.

- **Endpoint:** /FundTransferReverse
- **Method:** POST
- **Content-Type:** application/json
- **Request Body:**

```
{
  "InvoiceNumber": "INV-2023-001"
}
```

- **Response:**

```
{
  "WalletNo": "017XXXXXXXX",
  "Amount": 500.00,
  "TranDate": "2022-02-23T11:30:01.000",
  "InvoiceNumber": "INV123456789",
  "StatusCode": "200",
  "TranId": "TRN987654321",
  "StatusMessage": "Transaction successful"
}
```

- **Status Codes:**
 - 200: Success
 - 203: Fail
 - 401: Unauthorized
 - 206: Data error
- **Wallet Status Codes:** (To be provided by the API provider)

4. Date Range Transaction History

Retrieve transaction history for a specified date range and service ID.

- **Endpoint:** /FundTransferHistory
- **Method:** POST
- **Content-Type:** application/json
- **Request Body:**

```
{  
  "FromDate": "2025-06-01",  
  "ToDate": "2025-06-01",  
  "ServiceId": "ETC"  
}
```

- **Response:**

```
[  
  {  
    "WalletNo": "017XXXXXXXXX",  
    "Amount": 500.00,  
    "TranDate": "2022-02-23T11:30:01.000",  
    "InvoiceNumber": "INV123456789",  
    "StatusCode": "200",  
    "TranId": "TRN987654321",  
    "StatusMessage": "Transaction successful"  
  }  
]
```

- **Status Codes:**
 - 200: Success
 - 203: Fail
 - 401: Unauthorized
 - 206: Data error
- **Wallet Status Codes:** (To be provided by the API provider)

5. Process Daily Settlement

Process daily settlement for transactions within a date range.

- **Endpoint:** /SettlementProcess
- **Method:** POST
- **Content-Type:** application/json
- **Request Body:**

```
{  
  "FromDate": "2025-06-01",  
  "ToDate": "2025-06-01",  
  "ServiceId": "ETC",  
  "ProcessId": "20250603"  
}
```

- **Response:**

```
{  
  "ProcessId": "20250603",  
  "Amount": 500.00,  
  "TranDate": "2022-02-23T11:30:01.000",  
  "TranId": "TRN987654321",  
  "StatusCode": "200",  
  "StatusMessage": "Transaction successful"  
}
```

- **Status Codes:**
 - 200: Success
 - 203: Fail
 - 401: Unauthorized
 - 206: Data error
- **Wallet Status Codes:** (To be provided by the API provider)
